## **IN THE CLAIMS**

Please amend the claims as follows:

1. (Currently Amended) A kneadable and moldable bone-replacement material which consists of comprising a mixture of:

A) calcium containing ceramic particles wherein the ceramic particles comprise a calcium phosphate ratio having a molar Ca/P relationship between 1.0 and 2.0, wherein the calcium phosphate is selected from the following group: : Dicalcium phosphate dihydrate (CaHPO<sub>4</sub> x 2 H<sub>2</sub>O), dicalcium phosphate (CaHPO<sub>4</sub>), alpha-tricalcium phosphate (alpha-Ca3(PO<sub>4</sub>)2), beta-tricalcium phosphate (beta-Ca3(PO<sub>4</sub>)2), calcium deficient hydro-xylapatite (Ca9(PO4)5(HPO4)OH), hydro-xylapatite (CA10(PO<sub>4</sub>)6OH)2), carbonated apatite (Ca10(PO4)3(CO3)3(OH)2), flouride-apatite (Ca10(PO<sub>4</sub>)6(F,OH)2), chloride-apatite (Ca10 (PO4)6(Cl,OH)2), whitlockite ((Ca,Mg)3(PO<sub>4</sub>)2), tetracalcium phosphate (Ca4(PO4)2O), oxyapatite (CA10(PO4)6O), beta-calcium-pyrophosphate (beta-Ca2(P2O7), alpha-calcium-pyrophosphate, gamma-calcium-pyrophosphate, octo-calcium-phosphate (Ca8H2(PO4)6 x 5 H2O), wherein at least 50% of the ceramic particles have a pore size between 100 and 500 micrometers, wherein a bulk density of the ceramic particles is between 0.6 g/ccm and 1.0 g/ccm, wherein the jarring density of the ceramic particles is between 0.7 g/ccm and 1.1 g/ccm and wherein an average diameter of the ceramic particles is between 100 and 250 micrometers.; and

A) calcium-containing ceramic particles wherein the ceramic particles comprise a calcium to phosphate ratio having a molar Ca/P relationship between 1.0 and 2.0, wherein the calcium phosphate is selected from the following group: dicalcium phosphate dihydrate (CaHPO<sub>4</sub> • 2 H<sub>2</sub>O); dicalcium phosphate (CaHPO<sub>4</sub>); alpha tricalcium phosphate ( $\alpha$ -Ca<sub>3</sub>(PO<sub>4</sub>)<sub>2</sub>); beta tricalcium phosphate ( $\beta$ -Ca<sub>3</sub>(PO<sub>4</sub>)<sub>2</sub>); calcium deficient hydroxylapatite (Ca<sub>9</sub>(PO<sub>4</sub>)<sub>5</sub>(HPO<sub>4</sub>)OH); hydroxylapatite (Ca<sub>10</sub>(PO<sub>4</sub>)<sub>6</sub>(OH)<sub>2</sub>); carbonated apatite (Ca<sub>10</sub>(PO<sub>4</sub>)<sub>3</sub>(CO<sub>3</sub>)<sub>3</sub>(OH)<sub>2</sub>); flourapatite (Ca<sub>10</sub>(PO<sub>4</sub>)<sub>6</sub>F<sub>2</sub>); chlorapatite (Ca<sub>10</sub>(PO<sub>4</sub>)Cl<sub>2</sub>); whitlockite; tetracalcium phosphate (Ca<sub>4</sub>(PO<sub>4</sub>)<sub>2</sub>O); oxyapatite (Ca<sub>10</sub>(PO<sub>4</sub>)<sub>6</sub>O); beta calcium pyrophosphate ( $\beta$ -Ca<sub>2</sub>P<sub>2</sub>O<sub>7</sub>); alpha calcium pyrophosphate; gamma calcium pyrophosphate; and octo-calcium

Page 3 Dkt: 2579.011US1

phosphate  $(Ca_8H_2(PO_4)_6 \cdot 5H_2O)$ ; wherein a bulk density of the ceramic particles is between 0.6

g/cm<sup>3</sup> and 1.0 g/cm<sup>3</sup> and wherein an average diameter of the ceramic particles is between 100

and 250 µm; and

B) a hydrogel or a substance that can be swelled into a hydrogel, and wherein:

C) the ceramic particles are of fully synthetic origin;

D) the individual ceramic particles have at least a partially cohesive, porous

structure; and

E) the majority of the ceramic particles have a non-spheric shape.

2. (Previously Presented) The bone-replacement material in accordance with claim

1, wherein the ceramic particles have an angular shape.

3. (Previously Presented) The bone-replacement material in accordance with claim

1, wherein the ceramic particles have a sphericity relationship S=Dmax/Dmin a largest diameter

Dmax and a smallest diameter Dmin which is larger than 1.2.

4. (Previously Presented) The bone-replacement material in accordance with claim

3, wherein the sphericity relationship S is larger than 3.

5 - 9. (Canceled)

10. (Previously Presented) The bone-replacement material in accordance with claim

1, wherein porosity of the ceramic particles is between 60 and 90 percent.

11.-16. (Canceled)

17. (Previously Presented) The bone-replacement material in accordance with claim

1, wherein a share of ceramic particles of non-spheric shape is at least 60%.

18.-20. (Canceled)

Serial Number: 10/510,028

Filing Date: December 14, 2004

Title: KNEADABLE, PLIABLE BONE REPLACEMENT MATERIAL

Dkt: 2579.011US1

Page 4

21. (Currently Amended) The bone-replacement material in accordance with claim 1,

further including wherein ceramic particles with an average diameter of 100 to 250 micrometers

are used together with those ceramic particles having an average diameter of 250 to 500

micrometers and/or together with those ceramic particles having an average diameter of 0.5 to

5.6 mm.

22.-25 (Canceled)

26. (Withdrawn) The bone-replacement material in accordance with claim 1, wherein

the ceramic particles consist of a mixture of different calcium-phosphates.

27-30. (Canceled)

31. (Previously Presented) The bone-replacement material in accordance with claim

1, further comprising metallic or semi-metallic ion shares as additives.

32. (Previously Presented) The bone-replacement material in accordance with claim

1, wherein the hydrogel or the substance which can be swelled into a hydrogel consists of fully

synthetic substances.

33. (Previously Presented) The bone-replacement material in accordance with claim

1, wherein the hydrogel or the substance which can be swelled into a hydrogel consists of natural

biological substances, preferably of plant origin.

34. (Previously Presented) The bone-replacement material in accordance with claim

1, wherein the hydrogel or the substance which can be swelled into a hydrogel consists of a

biotechnologically generated substance.

Serial Number: 10/510,028

Filing Date: December 14, 2004

Title: KNEADABLE, PLIABLE BONE REPLACEMENT MATERIAL

Page 5 Dkt: 2579.011US1

35. (Previously Presented) The bone-replacement material in accordance with one claim 32, wherein the hydrogel or the substance which can be swelled into a hydrogel consists of

a mixture of fully synthetic, natural biological or biotechnologically generated substances.

36. (Currently Amended) The bone-replacement material in accordance with claim 1,

wherein the hydrogel or the substance which can be swelled into a hydrogel contains one of the

following components: a) polyamino-acids or their derivatives, preferably polylysin or gelatin; b)

polysaccharides and their derivatives, preferably glycosaminoglycane glycosaminoglycan or

alginate; c) polylipides, fatty acids and their derivatives; d) nucleotides and their derivatives; or a

combination of the components as listed in a) through d).

37. (Withdrawn) The bone-replacement material in accordance with claim 1, wherein

the hydrogel or the substance which can be swelled into a hydrogel contains one of the following

components: a) polymethylenoxide or its derivatives; b) polyethylene, polyethylenoxide or their

derivatives; c) polypropylene, polypropylenoxide or their derivatives; d) polyacrylate or its

derivatives; or a combination of the components as listed in a) through d).

38. (Currently Amended) The bone-replacement material in accordance with claim 1,

wherein the hydrogel or the substance which can be swelled into a hydrogel consists of either a

glycosaminoglycane glycosaminoglycan or a proteoglycane proteoglycan or a mixture of those

two substances.

39. (Currently Amended) The bone-replacement material in accordance with claim

38, wherein the glycosaminoglycane glycosaminoglycan is a hyaluron-acid hyaluronic acid,

chondroitinsulfate, dermatansulfate, heparansulfate, heparine heparin or keratansulfate.

40. (Currently Amended) The bone-replacement material in accordance with claim 1,

wherein a concentration of the ready-to-use, hydrated hydrogel or a ready-to-use, hydrated

substance which can be swellen swelled into a hydrogel is between 0.1% and 20.0%.

Serial Number: 10/510,028

Filing Date: December 14, 2004

Title: KNEADABLE, PLIABLE BONE REPLACEMENT MATERIAL

Dkt: 2579.011US1

Page 6

41. (Currently Amended) The bone-replacement material in accordance with claim 1,

wherein a molecular weight of the hydrogel or the substance which can be swelled into a

hydrogel is larger than 300,000 Dalton and preferably larger than 500,000 Dalton.

42. (Currently Amended) The bone-replacement material in accordance with claim

41, wherein the molecular weight of the hydrogel or the substance which can be swelled into a

hydrogel is larger than 1,000,000 Dalton and preferably larger than 1,500,000 Dalton.

43. (Previously Presented) The bone-replacement material in accordance with claim

1, wherein the hydrogel is a liquid solution of a hyaluronate.

44. (Previously Presented) The bone-replacement material in accordance with claim

43, wherein the liquid solution of the hydrogel contains less than 99% water.

45. (Currently Amended) The bone-replacement material in accordance with claim

43, wherein the liquid solution of the hydrogel contains less that than 96.5% water.

46. (Currently Amended) The bone-replacement material in accordance with claim

43, wherein the molecular weight of the hyaluron-acid hyaluronic acid used is larger than 1.5 x

10<sup>6</sup> Dalton.

47. (Currently Amended) The bone-replacement material in accordance with claim

43, wherein the molecular weight of the hyaluron-acid hyaluronic acid used is between 0.5 x 10<sup>6</sup>

and  $1.0 \times 10^6$  Dalton.

48. (Currently Amended) The bone-replacement material in accordance with claim

43, wherein the molecular weight of the hyaluron acid hyaluronic acid used is smaller than 1 x

10<sup>6</sup> and preferably smaller than 0.5 x 10<sup>6</sup> Dalton.

Serial Number: 10/510,028

Filing Date: December 14, 2004

Page 7

49. (Previously Presented) The bone-replacement material in accordance with claim

1, wherein a specific gravity of the calcium-containing, porous ceramic particles is between 0.5

and 1.0 g/ccm.

50. (Previously Presented) The bone-replacement material in accordance with claim

1, wherein a weight relationship A/B between the hydrated hydrogel and the calcium-containing

ceramic particles is larger than 0.2.

51. (Previously Presented) The bone-replacement material in accordance with claim

50, wherein the weight relationship A/B is between 0.2 and 0.5.

52. (Withdrawn) The bone-replacement material in accordance with claim 50,

wherein the weight relationship A/B is between 0.5 and 0.9.

53. (Withdrawn) The bone-replacement material in accordance with claim 50,

wherein the weight relationship A/B is between 0.9 and 1.3.

54. (Withdrawn) The bone-replacement material in accordance with claim 50,

wherein the weight relationship A/B is between 1.3 and 2.0.

55. (Withdrawn) The bone-replacement material in accordance with claim 50,

wherein the weight relationship A/B is between 2 and 5.

56. (Withdrawn) The bone-replacement material in accordance with claim 50,

wherein the weight relationship A/B is larger than. 5.
